Rates and unit rates

Explore and build the idea

20 daily questions include C1 and C2. Use separate paper when helpful.

Lesson focus: I can find an amount per one unit and use it to compare rates.

R1. Find $\frac{2}{3} + \frac{1}{4}$.

R2. Yellow : purple is 2 : 5. There are 28 beads. Find both counts.

R3. Share $\frac{1}{3}$ liter equally among 2 cups. How much per cup?

R4. A recipe uses 2 cups beans for 3 cups rice. How many cups beans go with $\frac{9}{2}$ cups rice?

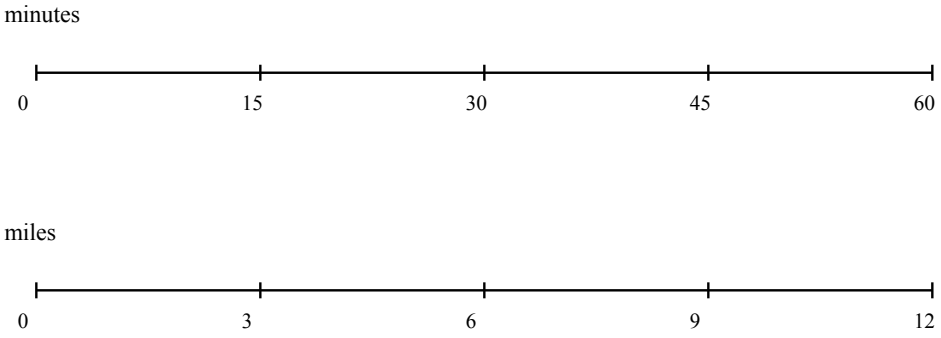

P1. A rider goes 20 kilometers in 4 hours at a steady speed. Find kilometers per hour.

P2. Eight apples cost $6.00. Find dollars per apple.

P3. Two cups of rice make 5 servings. Find cups per serving.

P4. A printer makes 15 cards in 3 minutes. Find cards per minute and minutes per card.

Practice and compare methods

20 daily questions include C1 and C2. Use separate paper when helpful.

P5. Pack A has 6 pencils for $2.40. Pack B has 10 pencils for $3.50. Which costs less per pencil?

P6. A skater travels 3 miles in 20 minutes at steady speed. Find miles per hour.

P7. A robot rolls 4 meters each second. Complete distances for 0, 2, and 5 seconds.

F. A scooter travels 5 miles in 30 minutes. There are __ half-hours in one hour, so the speed is __ miles per hour.

D. Ava says 8 apples for $6 costs $\frac{4}{3}$ dollars per apple because $8 \div 6 = \frac{4}{3}$. Is her unit correct?

X1. A cyclist travels 20 kilometers in 2 hours at steady speed. Find kilometers per hour.

X2. 8 markers cost $2.8. Find dollars per marker.

X3. A printer makes 28 cards in 4 minutes. Find cards per minute and minutes per card.

Worked example - compare with the slide model

A walker travels 2 miles in 30 minutes. Find miles per hour.

60 minutes is two groups of 30.

Two groups of 2 miles make 4 miles.

The rate is 4 miles per hour.

Result: 4 miles per hour

Rates and unit rates

Challenge, explain and check

20 daily questions include C1 and C2. Use separate paper when helpful.

C1. Runner A travels 6 miles in 30 minutes. Runner B travels 8 miles in 40 minutes. At steady speeds, who is faster? How far does each travel in 75 minutes?

C2. Shop A sells 4 notebooks for $6. Shop B sells 6 for $8.40. Find each unit price. Buying 12 notebooks, how much does the cheaper choice save?

Finish the lesson

S. The word per tells me to find the amount for one ___.

E. A cyclist travels 9 miles in 45 minutes at steady speed. Find miles per hour and minutes per mile.
