# Recall

Work from memory, then check with your tutor.

R1. Find $2\frac{1}{2} \div \frac{3}{4}$.

Answer: _____

R2. Three notebooks cost $2.45 each. What is the total cost?

Answer: _____

R3. Find $3^2$. Write the repeated factors.

Answer: _____

R4. Find $4 \div \frac{2}{3}$.

Answer: _____

## S. Return here near the end of the lesson

For this base, the matching height is __ because __.

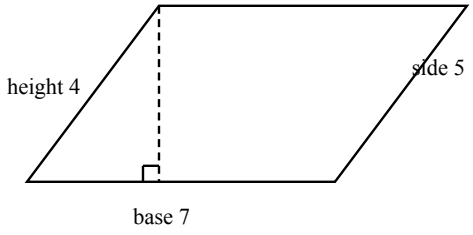

# Area from a base and height

Follow the slide labels. P = problem; F = your turn; D = discussion.

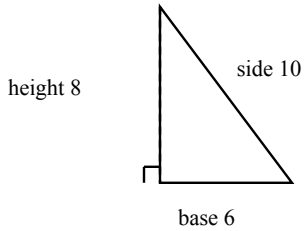

P1. A rectangle is 6 cm long and 2.5 cm wide. Find its area and perimeter.

Answer: _____

P2. A parallelogram has base 7 cm, height 4 cm, and slanted side 5 cm. Cut and move the end triangle. Find its area.

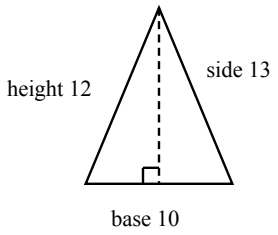

P3. A right triangle has perpendicular legs of 6 cm and 8 cm. Find its area. Use either leg as the base.

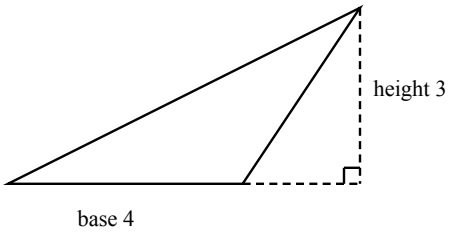

# Area from a base and height

Follow the slide labels. P = problem; F = your turn; D = discussion.

P4. An isosceles triangle has sides 13, 13, and 10 cm. Its height to the 10 cm base is 12 cm. Find the area.

P5. A triangle has vertices A(0, 0), B(4, 0), and C(6, 3), measured in cm. The height meets the extended base at (6, 0). Find its area.

P6. A triangle has base 5 cm and matching height 2.4 cm. Find its area. Would base × slanted side always work?

Answer: _____

# Area from a base and height

Follow the slide labels. P = problem; F = your turn; D = discussion.

F. A triangle has base 8 cm and height 2.5 cm. Complete: $A = \frac{1}{2} \times 8 \times __ = __$.

Answer: _____

D. Theo uses a triangle’s base 9 cm and height 4 cm. He writes $9 \times 4 = 36$ square cm. What is missing?

Answer: _____

# Exit ticket

Work on your own. Show a model or reason when the question asks for one.

E. A triangle has sides 10, 10, and 12 cm. The height to the 12 cm base is 8 cm. Find its area and name the length you used as height.

Answer: _____
