Recall

Work from memory, then check with your tutor.

R1. A rectangle is 8 cm by 2 cm. Find its area.

Answer: _____

R2. List multiples of 4 and 6. Find the least positive common multiple.

Answer: _____

R3. Data are 1, 2, 4, 4, 5, 6, 6. How many dots belong above 4 in a dot plot?

Answer: _____

R4. A prism has right-triangle ends with sides 3, 4, 5 cm and length 4 cm. Find surface area.

Answer: _____

S. Return here near the end of the lesson

A proportional relationship has __ for every nonzero input and passes through __.

Scale and proportional relationships

Follow the slide labels. P = problem; F = your turn; D = discussion.

P1. A 4 cm by 6 cm rectangle is copied with scale factor 2. Find the new side lengths and compare areas.

Answer: _____

P2. A triangle has side lengths 6, 8, and 10 cm. Copy it with scale factor $\frac{1}{2}$. Find its side lengths. What happens to its angles?

Answer: _____

P3. A map uses 1 cm for 25 km. Two towns are 3.6 cm apart on the map. Find their actual distance.

Answer: _____

Scale and proportional relationships

Follow the slide labels. P = problem; F = your turn; D = discussion.

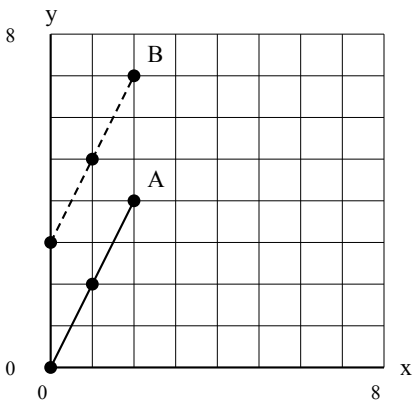

P4. A drawing has area 5 square cm. A scaled copy has all lengths three times as large. Find its area.

Answer: _____

P5. A table pairs x = 1, 2, 4 with y = 2.5, 5, 10. Find k and write y = kx.

Answer: _____

P6. Compare two straight-line graphs: A passes through (0, 0), (1, 2), (2, 4). B passes through (0, 3), (1, 5), (2, 7). Which is proportional?

Scale and proportional relationships

Follow the slide labels. P = problem; F = your turn; D = discussion.

P7. A ride costs $4 to start and $3 per mile. Write cost c for m miles. Is it proportional?

Answer: _____

P8. A faucet fills $\frac{3}{4}$ liter in $\frac{1}{2}$ minute at a constant rate. Write liters L after t minutes.

Answer: _____

F. A proportional relationship has (x, y) = (4, 14). Complete: k = 14 ÷ __ = __, so y = __x.

Answer: _____

Scale and proportional relationships

Follow the slide labels. P = problem; F = your turn; D = discussion.

D. Eli triples every length of a drawing. He says its area also triples. Explain and repair his claim.

Answer: _____

Exit ticket

Work on your own. Show a model or reason when the question asks for one.

E. A table pairs x = 1, 3, 5 with y = 5, 11, 17. Is y proportional to x? Support your answer with ratios or the value at zero.

Answer: _____
