Decimal place value and products

Explore and build the idea

20 daily questions include C1 and C2. Use separate paper when helpful.

Lesson focus: I can add, subtract, and multiply decimals while keeping track of the value of each digit.

R1. Complete the ratio-table pair: (3, 4), (12, __).

R2. 18 shells are 30% of a collection. Find the whole collection.

R3. A bottle is $\frac{3}{4}$ full and holds $\frac{2}{3}$ liter so far. Find its full capacity.

R4. The pairs (2, 7), (4, 14), and (6, __) have the same ratio. Complete the table.

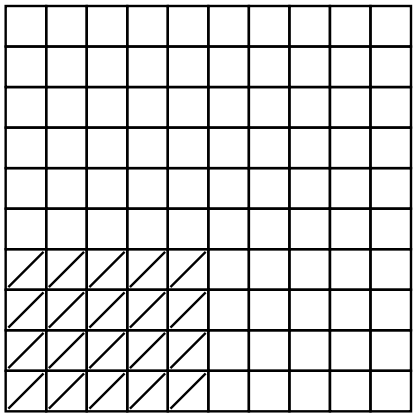

P1. Find 4.7 + 8.036.

P2. Find 12 − 4.685.

P3. A rope costs $2.35 per meter. What do 4 meters cost?

P4. Find 0.6 × 0.4. Is the product less than each factor?

Decimal place value and products

Practice and compare methods

20 daily questions include C1 and C2. Use separate paper when helpful.

P5. Find 0.15 × 0.02.

P6. A notebook costs $3.85 and a pen costs $1.67. You pay $10. Find the change.

F. Complete: 0.3 × 0.07 means 3 tenths × 7 hundredths = 21 __ = __.

D. Isaac says 0.6 × 0.4 = 2.4 because 6 × 4 = 24. Use place value to repair this.

X1. Find 2.7 + 0.154. Align equal place values.

X2. Find 12 − 0.181. Show regrouping across zeros.

X3. Find 0.6 × 0.05. Explain the product's place value.

X4. Ribbon costs $1.85 per meter. What do 7 meters cost?

Worked example - compare with the slide model

Find 3.8 + 0.475.

Write 3.800 + 0.475.

Add thousandths to thousandths and tenths to tenths.

3.800 + 0.475 = 4.275. The sum is a little above 4.

Result: 4.275

Decimal place value and products

Challenge, explain and check

20 daily questions include C1 and C2. Use separate paper when helpful.

C1. Fabric costs $3.75 per meter. Buy 2.4 meters and pay $20. Find the cost and change. Use an estimate to check the decimal placement.

C2. Rectangle A is 0.4 meter by 0.35 meter. Rectangle B is 0.14 meter by 0.9 meter. Find both areas and their difference. Explain why B’s area is less than 0.14 square meter.

Finish the lesson

S. I check a decimal answer by naming the units and ___.

E. Find 0.45 × 0.06. Explain why your decimal position is reasonable.
